

Dual-Action Trigger Airbrush

This precision airbrush features a dual-action trigger for independent air and paint control. It is constructed from durable materials for long-lasting performance and suitable for various applications.

Product Overview

Dual-Action Precision Airbrush

This precision airbrush features a dual-action trigger mechanism, allowing for independent control over airflow and paint volume. Constructed from durable materials, it is engineered for long-lasting performance in professional and hobbyist environments. Its versatile design supports adjustable spray patterns, making it suitable for a wide range of applications including illustration, model painting, and fine art.

Key Features

Control Mechanism	Dual-Action Trigger
Suitable Applications	Illustration, Model Painting, Fine Art

Maintenance & Design

Design Highlights

- Easy to clean
- Adjustable spray patterns
- Durable construction
