

# Dual Band Mobile Signal Booster Repeater Kit

This dual-band mobile signal booster repeater kit improves cellular signal strength. The set includes a signal repeater, external antenna, internal antenna, and coaxial cable for reliable connectivity.

## ADDITIONAL IMAGES

## Product Overview

### Dual-Band Signal Enhancement

This dual-band mobile signal booster repeater kit is engineered to significantly improve cellular signal strength, call quality, and data speeds in areas suffering from poor network coverage. By capturing weak external signals and rebroadcasting them internally, the system ensures reliable voice and data connectivity. The kit is a complete solution, including the repeater unit, antennas, and cabling, making it suitable for deployment in homes, offices, and vehicles.

## Technical Specifications

### Model Frequency Configurations

Model	Frequency Band 1	Frequency Band 2
RP-GU100D	GSM 900MHz	3G W-CDMA 2100MHz
RP-GD100D	GSM 900MHz	DCS/LTE 1800MHz
RP-DU100D	3G CDMA 2100MHz	DCS/LTE 1800MHz
Other	CDMA 850MHz	PCS 1900MHz
Other	GSM 900MHz	4G LTE 2600MHz
Other	3G W-CDMA 2100MHz	4G LTE 2600MHz

## System Components

### Kit Components

- Signal Repeater Unit
- External Antenna
- Indoor Antenna
- Coaxial Cable

### Suitable Environments

Residential, Office, Vehicular
