

Dual Bay Lithium-Ion Battery Charger

This dual bay charger is designed for cylindrical rechargeable lithium-ion batteries. It features two independent charging channels, LED indicators, and spring-loaded contacts.

Overview

Dual Bay Battery Charger

This dual bay charger is designed for efficient and safe charging of cylindrical rechargeable lithium-ion batteries. Featuring two independent charging channels, it allows for simultaneous charging and monitoring of battery status. Built-in safety features, including overcharge and reverse polarity protection, ensure reliable operation for professional battery management.

Technical Specifications

Charging Channels	2
Supported Chemistry	Lithium-ion

Safety & Features

Safety Protections

- Overcharge protection
- Reverse polarity protection

Status Indicators

LED Indicators

Design

Contact Mechanism	Spring-loaded contacts
