

Dual Burner Gas Cooktop

This dual burner gas cooktop is designed with a stainless steel finish. It features front-mounted control knobs to adjust flame intensity.

Product Overview

High-Performance Dual Burner Cooktop

The ZK-600 dual-burner gas cooktop is engineered for efficient cooking in professional or home environments. Featuring a durable stainless steel finish, this unit is built for longevity and easy maintenance. Its dual-burner system utilizes concentric ring designs to ensure even heat distribution across your cookware, while front-mounted knobs allow for precise control over flame intensity.
