

# Dual Channel 2x30 UHF Wireless Microphone System

This UHF wireless microphone system has 2x30 selectable frequencies for easy channel changes. Its antenna diversity design ensures a long transmitting distance of 60m without signal drops.

## Overview

### Professional UHF Wireless Performance

The UH-08 is a professional-grade dual-channel wireless microphone system designed for reliable audio transmission. Featuring advanced digital diversity technology and 60 meters of operating range, it ensures clear sound quality for stage performances, presentations, and events. With 2x30 selectable multi-frequency channels and automatic synchronization, this system offers flexible setup and robust interference avoidance.

## Technical Specifications

Frequency Range	480~960MHz
Operating Distance	60 m
Channels	60

## Features

### Sync Method

Auto Synchronizing

### Interference Protection

ID Code Locking, Digital Diversity

## System Configuration
