

Dual-Channel Professional Audio Amplifier

This professional power amplifier is designed for high-quality audio reproduction. It features dual-channel operation, independent volume controls, and protection circuitry, and it is rack-mountable for a variety of professional audio applications.

Overview

Professional Power Amplifier

The HT-P350 is a high-quality dual-channel professional audio amplifier designed to deliver reliable performance in demanding environments. Equipped with independent volume controls and comprehensive signal and clip monitoring for each channel, it provides precise audio management. Its rack-mountable design ensures easy integration into professional sound systems, while integrated protection circuitry safeguards the unit for long-term operational stability.
