

Dual Channel VHF Wireless Microphone System

This wireless microphone system includes a VHF wireless receiver and two handheld microphones. The receiver features dual antennas for reliable signal reception and individual volume controls for each microphone.

Product Overview

Versatile Wireless Solution

This VHF wireless microphone system is designed for clarity and reliability, featuring a robust receiver paired with two handheld microphones. The system utilizes dual antennas to maintain a stable signal connection, making it an excellent choice for public speaking, presentations, and karaoke events. Individual volume controls allow for precise sound management for each channel.
