

# Dual-Channel Wireless Handheld Microphone System

This dual-channel wireless microphone system features a receiver with dual antennas for stable signal reception. The microphones have high-sensitivity capsules, ensuring clear and accurate sound reproduction.

## Product Overview

### Dual-Channel Wireless Performance

This dual-channel wireless microphone system provides a professional solution for live performances, public speaking, and presentations. Utilizing multistage narrow-band high and medium frequency filters, the system delivers high signal stability and low noise interference. With an operating range of up to 60 meters, it offers the reliability and dynamic range required for clear, consistent sound reproduction in various settings.

## Technical Specifications

### Dynamic Range

**90 dB**

Dynamic Range

Frequency Range	VHF 220-270 MHz
Frequency Response	40Hz - 20KHz
Operating Distance	60 m

## Power and Design

Receiver Input Voltage	AC220V-240V, 50/60Hz
Microphone Battery	2 x AA 1.5V
Construction	Metal Receiver, Plastic Handheld
