

Dual Channel Wireless Microphone System

This wireless microphone system is designed for professional audio applications. It features a receiver unit with dual channels and two handheld microphones with integrated antennas.

Overview

Dual Channel Wireless System

The SKW-101 is a professional-grade dual channel wireless microphone system engineered for high-fidelity audio performance. Featuring two handheld microphones and a dedicated receiver unit, this system allows for simultaneous usage with independent volume control for each channel. It is an ideal solution for live performances, corporate presentations, and professional recording environments requiring stable, clear, and interference-free signal transmission.
