

Dual Channel Wireless Microphone System

This wireless microphone system features dual-channel receiver with two handheld microphones. It operates on specific frequency bands with Sync IR and PLL and has 200 channels.

Product Overview

Professional Wireless Audio

The Dual Channel Wireless Microphone System is engineered for reliable performance in live sound, presentations, and audio reinforcement applications. Utilizing UHF technology with PLL synthesis and IR synchronization, it ensures stable signal transmission across 200 selectable channels. The system includes two robust metal handheld microphones and a feature-rich receiver with versatile output options for seamless integration into professional audio setups.

Technical Specifications

Frequency Range	620-950MHz
Frequency Response	80Hz-18KHz
Operating Range	60 m
Total Channels	200
Microphone Power	1.5V x 2

Connectivity

Available Outputs

- Balanced XLR
- Unbalanced 1/4 inch

Construction

Metal Handhelds

Features

UHF, PLL, IR Sync, Dual Channel
