

Dual-Color Emergency and Indicator Light

This emergency light functions as an indicator with a dual-color design, featuring both blue and red light sections. Encased in a clear, aerodynamic housing, the light provides enhanced visibility and is designed for mounting on vehicles.

Product Overview

Dual-Color Emergency and Indicator Light

This versatile emergency and indicator light is engineered for high-visibility signaling in demanding environments. Featuring a dual-color design with distinct blue and red sections, it ensures clear, attention-grabbing warnings. The unit is encased in a clear, aerodynamic housing for durability and improved light dispersion, making it an ideal solution for vehicle mounting and surface-based emergency signaling.

Technical Specifications

Design Features

- Dual-color configuration
- Clear aerodynamic housing
- Central ventilation/speaker section

Visibility

High Visibility • Emergency Ready

Light Colors

Blue, Red

Mounting Application

Vehicle or surface mount
