

# Dual Compartment Electric Food Warmer

This electric food warmer features dual stainless steel compartments with transparent lids, allowing for simultaneous warming of different dishes. The unit includes an adjustable temperature control knob and a durable base for stable countertop placement.

## Product Overview

### Professional Dual-Compartment Warming Solution

This electric food warmer is designed with dual stainless steel compartments, allowing for the simultaneous warming of different dishes. Featuring transparent lids and adjustable temperature control, it is an ideal solution for maintaining optimal serving temperatures during buffets and catering events. The removable compartments ensure easy cleaning, while the durable base provides stable placement on any countertop.

## Technical Specifications

Rated Voltage	120 V
Frequency	60 Hz
Power Consumption	200 W

## Design & Build

Material	Stainless Steel
Compartment Configuration	Dual Compartment
Lid Type	Transparent

## Features

### Key Features

- Adjustable temperature control knob
- Removable compartments for easy cleaning
