

Dual-Direction Ratchet Wrench Set

This set features wrenches made from chrome vanadium steel with a finely polished, mirror finish. The wrenches have an open end with 2 teeth and a box end with 72 teeth, meeting and exceeding ANSI standards.

Product Overview

Dual-Direction Ratchet Wrench Set

This dual-direction ratchet wrench set is engineered for efficient and versatile fastening in professional mechanical applications. Featuring a combination open-end and ratcheting box-end design, these tools allow for continuous operation without the need to lift the wrench, significantly improving speed and ease of use. Constructed from high-quality Chrome Vanadium steel, these wrenches are built for durability and long-lasting performance.
