

Dual-Ended Mattock Head

The mattock head is a versatile tool used for digging, prying, and chopping. Its robust construction allows it to break up hard soil, roots, and rocks.

Product Overview

Professional Dual-Ended Mattock Head

This dual-ended mattock head is a versatile, heavy-duty tool designed for demanding digging, prying, and chopping tasks. Featuring a robust construction capable of breaking through hard soil, dense roots, and rocky terrain, it is an essential implement for landscaping, gardening, and construction projects. The design includes a central eye for secure handle insertion and a dual-purpose head with a pointed pick on one side and a broad blade on the other.

Design & Features
