

Dual Fuel Dispenser with Four Nozzles

This fuel dispenser is designed to dispense two different types of fuel concurrently. It features an electronic display for monitoring price and volume, ensuring accuracy and ease of use.

Product Overview

Dual Fuel Dispenser System

This industrial-grade dual fuel dispenser is engineered for high-efficiency operations, featuring a robust four-nozzle configuration. It allows for the simultaneous dispensing of two different fuel types, maximizing throughput at fueling stations. Designed with durable materials and integrated electronic displays, it ensures accurate price and volume tracking for professional commercial use.

Technical Specifications

Number of Nozzles	4
Fuel Types Supported	2
Model Number	JDK50F424

Features

Safety Standards

Industrial Rated • Durable Construction

Display Interface	Electronic Display, Volume Reading, Price Reading
