

Dual Fuel Portable Generator

This portable generator can operate using either LPG or gasoline. It includes AC and DC outlets along with a digital meter for performance monitoring.

Overview

Versatile Dual Fuel Power Solution

The PG3500D is a robust portable generator engineered for flexibility and reliability in various power-critical situations. By offering dual-fuel compatibility, it allows users to switch seamlessly between LPG and gasoline, ensuring continuous operation based on fuel availability. Designed with a digital monitoring interface and multiple output options, this unit provides a dependable power source for both professional and recreational applications.

Performance Metrics

Gasoline Performance

3000 W

Peak Output

2800 W

Rated Output

LPG Performance

2700 W

Peak Output

2520 W

Technical Specifications

Compliance & Standards

CE • EU-V

Supported Fuel Types

LPG, Gasoline

Connectivity & Outlets

Available Outlets

Port Type	Specification
AC Output	120V / 20A
DC Output	12V / 8.3A (Battery Charging)

Features

Monitoring & Control

- Integrated Digital Meter
- Portable Design
