

Dual Head Rubber Mallet

This mallet features a dual-sided head with differing hardness rubber faces. It is designed for delicate work where marring or damage is a concern.

Product Overview

Professional Dual Head Rubber Mallet

This versatile hand tool features a dual-sided head designed with two different rubber hardness levels to provide controlled striking force for delicate applications. The mallet is engineered to prevent marring or surface damage, making it an essential choice for furniture assembly, sheet metal shaping, and tile installation. Built for reliability, the tool includes a sturdy wooden handle that ensures a comfortable grip and long-lasting performance in professional environments.
