Product Overview

Smart Solar Security Lighting

The DR-0569 solar security light offers a robust, energy-efficient solution for outdoor illumination. Designed for wireless installation, it harnesses solar energy during the day to provide automated lighting at night. Its dual adjustable LED floodlights and motion-sensing technology ensure enhanced security for driveways, yards, and pathways.

Technical Specifications

Installation	Wireless
Power Source	Solar energy
Operation	Automatic night activation

Design Features

LED Configuration	Dual adjustable heads
Weatherproofing	Yes
Motion Detection	Automatic Activation, Security Sensor
