

Dual Nozzle Fuel Dispenser

This fuel dispenser is equipped with two nozzles for efficient refueling operations. It features a digital display for volume and price, along with integrated hoses for easy handling.

Product Overview

Dual-Nozzle Efficiency

This dual-nozzle fuel dispenser is engineered for high-efficiency commercial and retail refueling operations. Its robust construction ensures long-term durability in demanding environments, while the integrated high-precision digital displays provide clear visibility of volume and pricing. Designed for versatility, this unit supports both gasoline and diesel dispensing.

Technical Specifications

Key Features

- Digital volume display
- Integrated price calculation
- Ergonomic hose design
- Robust exterior construction

Nozzle Configuration	Dual nozzles
Compatible Fuel Types	Gasoline, Diesel
