

Dual-Paddle Electric Mixer

This robust electric mixer features dual mixing paddles for thorough and consistent blending of viscous materials. Its variable speed settings and ergonomic handle provide comfortable control for demanding mixing applications.

Overview

Professional Dual-Paddle Performance

The R6203 is a robust and efficient dual-lever electric mixer designed for demanding mixing applications in professional construction and renovation. Featuring a powerful motor and dual mixing paddles, it ensures thorough and consistent mixing of various viscous substances including paints, mortars, and adhesives. Its ergonomic handle design and variable speed settings provide superior control while minimizing user fatigue during extended use.

Key Features

Equipment Highlights

- Dual-paddle configuration for consistent results
- Variable speed control for material versatility
- Ergonomic handle design for comfort
- Durable construction for challenging environments

Typical Applications

Paint, Mortar, Adhesives, Viscous Materials

Performance

Mixer Mechanism

Dual-Lever / Dual-Paddle
