

# Dual-Panel Sensor Array with Control Box

This dual-panel sensor array features a control box with red wiring connected to a dual-panel sensor array. The sensor array consists of two rectangular panels, each with a light blue surface and dark blue horizontal lines.

## Product Overview

### Dual-Panel Sensor Array System

This advanced sensor system features a robust, dual-panel sensor array engineered for precision detection tasks. The integrated electronic control box provides reliable signal processing, utilizing a ridged design to ensure durability and effective heat dissipation. Perfectly suited for industrial automation and monitoring applications requiring high-sensitivity inputs.

## Technical Configuration

### Structural Design

- Dual rectangular sensor panels
- Black protective framing
- Ridged control box chassis
- Dedicated port architecture

<b>Component Type</b>	Sensor Array, Control Unit, Electronic Assembly
<b>Sensor Interface</b>	Light blue panel surface with dark blue horizontal alignment lines

## Connectivity

### Wiring Interface

Red signal wiring • Multi-port control connection
