

# Dual Pedal Foot Switch

This foot switch provides hands-free control, ideal for operations requiring the use of both hands. It allows the operator to control equipment while freeing their hands for other tasks.

## Overview

### Hands-Free Industrial Control

This dual pedal foot switch is designed to enhance operational efficiency by allowing hands-free control of industrial equipment and machinery. Featuring two independent pedals in a durable metal housing, it provides a reliable solution for environments where both hands must remain occupied. The momentary action switches offer tactile feedback with an audible click, ensuring precise activation for laboratory or industrial applications.

## Technical Specifications

### Wiring Configuration

- Push-on
- Push-off

Switch Action	Momentary
Number of Pedals	2
Housing Material	Durable Metal

## Compliance & Quality

Certifications	CE
