

Dual-Polarized Directional Antenna

This dual-polarized directional antenna is designed for WCDMA/CDMA2000 communication systems. It has a frequency range of 1920-2170 MHz, $\pm 45^\circ$ polarization and 15 dBi gain with adjustable electrical downtilt options (0/3/6/9 degrees).

Product Overview

High-Performance Communication Solution

This dual-polarized directional antenna is engineered for optimal performance in WCDMA and CDMA2000 communication systems. It provides a stable gain of 15 dBi and supports flexible coverage through adjustable electrical downtilt options. Designed for durability and signal integrity, it features integrated lightning protection and excellent cross-polarization isolation for demanding wireless infrastructures.

Electrical Specifications

Gain

15 dBi

Gain

Frequency Range	1920-2170 MHz
Polarization	$\pm 45^\circ$ Dual-Polarized
Horizontal Beam Width	90 °
Vertical Beam Width	9 °

Performance Metrics

VSWR	1.4
Isolation	30 dB
Cross-Polar Ratio	20 dB
Front-to-Back Ratio	25 dB

Operational Settings

Electrical Downtilt

- 0
- 3
- 6
- 9

Lightning Protection

DC Ground

Max Power per Input	300 W
