Overview

Dual Port Charging Solution

This dual-port battery charger is designed to efficiently power 18V battery systems, allowing for the simultaneous charging of two units. With a robust design featuring integrated cooling, it ensures reliable performance and heat dissipation during operation. The unit includes advanced monitoring capabilities, such as LED status indicators, fault detection, and temperature management, making it a dependable choice for maintaining power tool readiness.

Electrical Specifications

Charging Current per Port

2.4 A
Current

Input Voltage	AC 100-240V
Input Frequency	50-60Hz
Output Voltage	21 V

Features

Key Features

- Simultaneous dual-port charging
- Integrated cooling vents
- LED charging status indicators
- Built-in fault detection
- Temperature monitoring

Compatibility
