

Dual Port Cable and Phone Wall Plate

This wall plate is designed for terminating cable and phone connections. It is constructed from durable GE Polycarbonate material to withstand mechanical stress and resist impact, abrasion, fading, and discoloration.

Product Overview

Professional Connectivity Solution

This dual port wall plate is engineered for high-abuse applications, constructed from durable GE Polycarbonate (PC) material. It provides excellent resistance to impact, abrasion, and environmental factors like grease, oils, and moisture. Designed with safety and aesthetics in mind, it features rounded edges to prevent injury and a smooth, dust-resistant finish that complements any wall covering.
