Overview

Versatile Rail Logistics Solution

This heavy-duty flat wagon is engineered for high-performance rail transit, offering a robust platform designed for dual-purpose utility. It is optimized for the secure transport of both ISO containers and general goods, featuring a reinforced undercarriage and reliable suspension systems. Built for durability and efficiency, this wagon ensures smooth operation across railway networks for demanding logistics applications.

Technical Specifications

Track Gauge	1435 mm
Load Capacity	46.3 t
Model Designation	NX70A

Features

Construction Details

- Robust flat platform design
- Integrated securing points
- Standard railway coupling systems
- Heavy-duty braking systems
- Reinforced undercarriage

Cargo Compatibility	ISO Containers, General Goods, Heavy Cargo
