

Dual Reservoir Brake Master Cylinder Assembly

This brake master cylinder assembly is designed for automotive braking systems. It features a dual reservoir, with a translucent plastic construction for monitoring fluid levels and a cast metal cylinder body.

Product Overview

Dual Reservoir Brake Master Cylinder

This dual reservoir brake master cylinder assembly is engineered for reliable hydraulic pressure generation in automotive braking systems. Designed with a translucent reservoir for convenient fluid level monitoring, it ensures maintenance efficiency and operational safety. This unit is a direct replacement component tailored for specific heavy-duty truck applications.

Technical Details

OE Number	NM3089
Item Identifier	NM3089

Compatibility

Compatible Vehicles

- 2000 Chevrolet Truck Silverado 1500 2wd

Safety & Maintenance

Required Brake Fluid

DOT 3
