

# Dual-Rod Water Heater Element

This water heater element provides efficient and reliable heating for various applications. It features a dual-rod design for rapid and uniform heat distribution and is constructed from high-quality materials for a long lifespan.

## Product Overview

### High-Efficiency Dual-Rod Heating

The JS-03W water heater element is engineered for reliable and efficient water heating across residential, commercial, and industrial applications. Its dual-rod configuration ensures rapid, uniform heat distribution, while the use of high-quality materials provides excellent resistance to corrosion and an extended operational lifespan. Designed for secure installation, this robust component features a standard square flange mounting plate.

## Technical Specifications

Heating Element Type	Dual-Rod
Mounting Type	Square Flange
Mounting Holes	4

## Application

Suitable Environments	Residential, Commercial, Industrial
-----------------------	-------------------------------------

## Features

### Product Advantages

- Corrosion-resistant construction
- Rapid heat distribution
- Uniform heating performance
- Secure square flange installation
