

Dual-Shaft Industrial Shredder

This shredder is designed for heavy-duty material processing, featuring a high-capacity hopper and dual-shaft cutting rotors. It is ideal for recycling applications, waste management, and volume reduction of bulky materials.

Product Overview

Industrial-Grade Material Reduction

The Dual-Shaft Industrial Shredder is designed for heavy-duty material processing and efficient size reduction in recycling and waste management facilities. Engineered with a multi-axis double-roller design, it offers high torque and reliable performance for a wide range of materials including plastics, rubber, cables, and glass. The robust steel construction and specialized cutting blades ensure consistent output even for irregular shaped items like frames, boxes, and tubes.

Technical Specifications

Processing Capacity

5000 kg/h

Min Output

8000 kg/h

Max Output

Machine Weight	12000 kg
Total Motor Power	180 KW
Blade Style	Square

Compatibility

Material Suitability	Waste wires/cables, PVC/PE/PP/PS/ABS Plastics, Glass, Copper clad laminate, Rubber/Tires, Plastic wood pipes
----------------------	--

Physical Dimensions

Equipment Footprint

Dimension	Value (cm)
Length	430
Width	200
Height	270
