Product Overview

Dual Slot Lithium-Ion Charger

This dual-slot 3V lithium-ion battery charger is designed for efficiency and safety. It features independent charging channels for each slot, allowing for simultaneous or separate battery management, complete with an LED display for status monitoring. With integrated protection against short circuits and reverse polarity, it ensures reliable performance for professional use.

Certifications

CE, ROHS

Technical Specifications

Output Specifications

4.5 V

Output Voltage

250 mA

Output Current per Slot

Charging Control Method

- ΔV control
- 5-hour timer control

Dimensions

44 x 27 x 83 mm

Input Voltage

AC 100V-240V / DC 12V

Safety & Features

Safety Protections

Short Circuit Protection • Reverse Polarity Protection • Overcharge Protection • Discharge Protection • Broken Battery Detection • Non-rechargeable Battery Identification
