

# Dual-Speed Electric Ventilation Fan

This electric fan is designed for ventilation applications in industrial and residential settings. It features a thermally protected ball bearing motor and operates at dual speeds.

## Overview

### Industrial-Grade Ventilation Solution

This dual-speed electric ventilation fan is engineered for reliable performance in both industrial and residential settings. Equipped with a thermally protected ball bearing motor, it ensures longevity and consistent airflow. The unit offers versatile operation with dual-speed settings, making it an adaptable choice for various ventilation requirements.

## Electrical Specifications

Voltage	115 V
Frequency	60 Hz
Rated Current	3 A

## Performance Metrics

### Performance Highlights

**0.25 HP**  
Horsepower

**1150 RPM**  
High Speed

**850 RPM**  
Low Speed

## Technical Details

**Insulation Class**  
Class A

### Suitable Applications

- Industrial Ventilation
- Residential Ventilation

### Motor Features

Thermally Protected, Ball Bearing, Single-Phase
