

Dual-Station Industrial Ironing and Steaming Unit

This industrial unit combines electric ironing and steam functions. It features a dual-station design with individual compartments, adjustable arms, and a control panel.

Product Overview

Professional Dual-Station Pressing Solution

This industrial-grade ironing and steaming unit is engineered for high-volume textile processing environments. Featuring a robust dual-station design with independent compartments, it allows for efficient workflow management. The system includes adjustable arms for precise garment positioning and a dedicated control panel for granular adjustment of steam and heat settings, ensuring optimal results for professional applications.

Technical Specifications

Key Features

- Dual-station configuration
- Adjustable arms with ergonomic handles
- Integrated control panel
- Flat pressing surface

Stations	2
Application	Industrial Ironing, Steaming, Textile Processing
Frame Construction	Sturdy industrial metal frame with stable legs
