

Dual-Threaded Dowel Screw

This dowel screw features dual threaded ends for joining different materials. It is designed to create strong, concealed joints in furniture and woodworking projects.

Product Overview

Professional Dual-Threaded Dowel Screw

This dual-threaded dowel screw is engineered for creating strong, concealed joints between two pieces of material. Featuring coarse threads on one end for secure anchorage in wood and machine threads on the other for metal components, it provides a versatile solution for robust fastening. Its steel construction with a zinc coating ensures reliable corrosion resistance, making it an ideal choice for high-quality furniture assembly and woodworking projects.

Technical Specifications

Material	Steel
Surface Treatment	Zinc Coated
Thread Configuration	Coarse Thread (Wood), Machine Thread (Metal)

Applications

Common Applications

- Furniture Assembly
- Woodworking
- Concealed Joint Construction

Key Features

Performance Highlights

1 Zinc

Corrosion Resistance
