

Dual USB Car Charger Adapter

This dual USB car charger adapter allows for charging two devices simultaneously while on the go. It features overcurrent and overvoltage protection for safe and reliable charging.

Product Overview

Compact Dual USB Charging Solution

This dual USB car charger adapter is designed for efficient, simultaneous power delivery while on the go. Its compact form factor ensures a sleek fit in your vehicle's console, while universal compatibility supports a wide range of USB-powered devices. Engineered for safety, the unit includes built-in overcurrent and overvoltage protection to ensure reliable charging for your electronics.

Technical Specifications

Total Output Current

2.1 A

Total Current

Input Voltage	24 V DC
Output Voltage	5 V DC

Features & Safety

Safety Protections	Overcurrent Protection, Overvoltage Protection
Charging Capability	Simultaneous dual-device charging
