Product Overview

Panel-mount design allows for easy integration into vehicle dashboards or consoles.

Professional Vehicle Charging Solution

This dual USB car charger socket is engineered for seamless integration into vehicles, including cars, buses, and marine vessels. Featuring a robust panel-mount design, it provides a reliable 3.1A total output to efficiently power smartphones, tablets, and other USB-compatible electronics. Built with high-quality, fireproof materials and integrated safety protections, this socket ensures durable performance in demanding automotive environments.

Electrical Specifications

Total Output Current

3.1 A

Total Current

Port Configuration

- 2.1A Port
- 1.0A Port

Input Voltage

12V-24V

Design & Build

Includes a protective cap to prevent water and dust ingress when not in use.

Robust construction ensures reliable performance in automotive and marine applications.

LED Indicator

Blue • Green • Red

Housing Material

PC Fireproof Material

Operating Temperature

-25°C to +60°C

Safety & Installation

Safety Protections

Overcurrent Protection, Overheating Protection, Overcharging Protection, Reverse Polarity Protection

Terminal Connection

Pin Terminal

Package Contents

Complete kit includes mounting bracket, screws, and wiring connectors for straightforward installation.

What's in the box

Item	Quantity
5V 3.1A Dual USB Charger	1
Insulated Terminals	2
