

Dual-Use Generating and Welding Alternator

This dual-use alternator is driven by an internal combustion engine. It can be used as a mobile or stationary power supply unit for lighting and other applications in various locations.

Product Overview

Versatile Power and Welding Solution

The SD/SDC series is a high-performance dual-use machine engineered to provide both reliable power generation and welding capabilities. This versatile unit is specifically designed for demanding industrial and construction environments where space and cost efficiency are priorities. Its robust construction ensures sustained performance and durability, making it an essential tool for professionals needing a multifunctional power solution.

Key Features

Core Capabilities

Dual-Use Operation, Power Generation, Welding Capability, Robust Construction, Industrial Grade

Applications

Suitable Environments

- Construction Sites
- Industrial Maintenance
- Field Repair Operations
- Mobile Power and Welding
