

# Dual Voltage Vacuum Pump

This vacuum pump features dual voltage capability (110-220V/50-60Hz). It is suitable for use in refrigeration, HVAC, and other industrial processes requiring vacuum generation.

## Product Overview

### Professional Vacuum Generation

This high-performance vacuum pump is engineered for demanding industrial, HVAC, and refrigeration applications. It features a versatile dual-voltage design that allows for easy operation across different power standards. The robust construction and precise engineering ensure deep vacuum levels and reliable, long-lasting service in professional environments.

## Electrical Specifications

Voltage Compatibility	110V, 220V
Operating Frequency	50-60Hz

## Performance Data

### Core Performance Metrics

<b>5 Pa</b> Ultimate Vacuum	<b>1 HP</b> Maximum Motor Power
--------------------------------	------------------------------------

### Technical Comparison Table

Model	Displacement	Motor Power	Weight
VE215ND	42L/min	1/4 HP	6.5kg
VE225ND	64L/min	1/4 HP	6.5kg
VE245ND	128L/min	1/3 HP	8.8kg
VE260ND	170L/min	1/2 HP	11.3kg
VE280ND	226L/min	3/4 HP	11.5kg
VE2100ND	283L/min	1 HP	12kg

## Mechanical Specifications

Inlet Port Size	1/4" SAE
