

Duck-Shaped Humidifier for Home Use

This household electrical appliance increases humidity levels in a room. The air humidifier features a duck-shaped design and a transparent body to monitor water levels.

Product Overview

Duck-Shaped Humidifier

This uniquely designed duck-shaped humidifier is an efficient household appliance created to improve indoor air quality. It features advanced nanometer antibiosis technology and an integrated anion device to ensure clean, healthy mist output. With a 4L capacity and super-quiet operation, it is an ideal solution for maintaining optimal humidity in offices, bedrooms, or living spaces, especially in environments with air conditioning or heating.

Technical Specifications

Voltage	110V-220V 50Hz
Power	38 W
