

# Duct Mounted Air Purifier for HVAC Systems

This air purifier is designed for duct mounting in central air conditioning systems. It features filtration components for efficient air treatment in residential or commercial buildings.

## Overview

### Professional Air Purification for HVAC

This duct-mounted air purifier is engineered for seamless integration into central air conditioning systems, providing comprehensive air treatment for both residential and commercial environments. By installing directly within your existing ductwork, the unit ensures that purified air is circulated efficiently throughout the entire building. It features a robust rectangular design with dedicated air inlet and outlet points to optimize filtration performance and airflow.

## Technical Specifications

Application Scope	Residential, Commercial, HVAC Integration
Installation Type	Duct Mounted

## Design & Build

### Key Features

- Integrated filtration system
- Centralized air treatment
- Duct-integrated design
- Optimized air inlet/outlet

Form Factor	Rectangular
