

Duct Type Air Conditioner with Remote Control

This duct type air conditioner features five fan speeds and complete timer control with adjustable days. It offers auto restart function and auto operation with cooling, heating, dehumidifying, fan, and auto mode.

Product Overview

Professional Duct-Type Climate Control

This duct-type air conditioner is engineered for high-efficiency air distribution within complex HVAC systems. Designed for commercial and industrial environments, the unit features a robust metal housing and twin centrifugal fans to ensure reliable, high-volume airflow. Its concealed design makes it an ideal solution for spaces requiring powerful cooling without compromising aesthetics.

Technical Specifications

Airflow Mechanism	Twin centrifugal fans
Installation	Concealed duct-type
Housing Material	Durable metal
Control System	Integrated electrical control box with remote control

Application

Recommended Use Cases	Commercial, Industrial, HVAC Systems
