

Ductile Cast Iron Flanged Pipe Fittings

Ductile cast iron fittings are designed for industrial piping systems. They feature flanged connections ensuring secure, leak-proof joints and are suitable for water, gas, and wastewater conveyance.

Product Overview

Industrial Ductile Cast Iron Fittings

These ductile cast iron fittings are engineered for robust performance in demanding industrial piping systems. Featuring secure flanged connections, they ensure leak-proof joints that maintain integrity under pressure. Their durable construction provides high strength and excellent corrosion resistance, making them a reliable choice for water, gas, and wastewater conveyance applications.

Technical Specifications

Material	Ductile Cast Iron
Connection Type	Flanged

Key Features

Performance Benefits	High Strength, Corrosion Resistant, Leak-Proof Joints
----------------------	---

Applications

Application Areas

- Water Conveyance
- Gas Distribution
- Wastewater Systems
