

Ductile Iron Pipes for Water Supply

These ductile iron pipes are designed for use in municipal water supply projects. They are engineered for high-pressure water transport, ensuring reliable and efficient water distribution.

Product Overview

High-Performance Ductile Iron Piping

These centrifugal ductile iron pipes are engineered for robust municipal water supply infrastructure. Designed for durability and high-pressure transport, they are available in a wide range of diameters from DN80 to DN2600mm. The system is built to meet international quality standards, ensuring reliable performance across diverse environmental conditions.

Technical Specifications

Available Lengths

- 6 meters
- 8.15 meters

Annual Production Capacity

38000 km

Pipeline Capacity

Diameter Range

DN80 - DN2600mm

Compliance & Certification

Certification Overview

Certification Type	Standard/Body
Quality Management	ISO 9001
Environmental Management	ISO 14001
Occupational Health & Safety	GB/T28001
International Quality	BV / KS

Quality Standards

ISO 9001, ISO 14001, GB/T28001, BV Certified, KS Certified
