

Ductile Iron Pipes with Protective Coating

Ductile iron pipes designed for various industrial applications. The pipes have a black exterior coating and a red interior lining, with some wrapped in green protective material.

Product Overview

High-Performance Ductile Iron Infrastructure

These centrifugally cast ductile iron pipes are engineered for robust infrastructure applications, offering exceptional durability and reliability in diverse environments. With a wide range of specifications, the system includes various protective coatings for both interior and exterior surfaces to ensure long-term performance. These pipes serve as a critical component in large-scale water processing and transport projects globally.

Technical Specifications

Available Lengths

- 6 meters
- 8.15 meters

Diameter Range

DN80 - DN2600mm

Quality and Standards

Certifications

ISO 9001, ISO 14001, GB/T28001, BV Certified, KS Certified

Performance Metrics

Production Capacity

38000 km

Annual Pipeline Capacity
