

Duplex Plastic Extruder

This duplex extruder is a robust and efficient solution for plastic extrusion processes. The machinery is designed for high-volume production, ensuring consistent output and optimal performance.

200C/150C两复合挤出机组
200C/150C Duplex extruder

Overview

High-Performance Duplex Extrusion

The Duplex Plastic Extruder is a robust and efficient solution engineered for high-volume plastic extrusion processes. Designed to deliver consistent output and optimal performance, this machinery is suitable for a wide range of industrial plastic manufacturing applications. Its dual-temperature configuration ensures versatility and reliability in demanding production environments.

Technical Specifications

Primary Temperature Rating

200 C Primary Extruder	150 C Secondary Extruder
----------------------------------	------------------------------------

Equipment Type	Duplex Extruder
Application Suitability	Plastic Manufacturing, High-Volume Production, Industrial Extrusion
