

Durable Car Parts Rack for Skylight Applications

This car parts rack is designed for skylight applications. Its sturdy construction provides reliable support for various car part sizes and weights, optimizing space and accessibility.

Product Overview

Industrial Storage Solution

This durable car parts rack is engineered for efficient industrial storage, specifically designed to optimize warehousing management and material handling. Its robust construction ensures reliable performance, while the stackable and foldable design maximizes space utilization in workshops and warehouses. The rack facilitates easy stocktaking and safe transport, helping to reduce labor costs and prevent material damage throughout the manufacturing cycle.

Technical Specifications

Material	Stainless steel
Item Number	DZ60
Warranty	1 year
Certifications	ISO9001

Key Features

Operational Advantages

- Rational warehousing management facilitates easier stocktaking
- Stackable up to four layers to save storage space
- Foldable design saves 20% of storage space when not in use
- Compatible with hydraulic pallet cars and elevators for easy transport
- Designed for safe and easy operation by any user

Recommended Usage

Industrial • Manufacturing • Automotive Workshops
