

Durable Cast Iron Soil Pipe

Durable cast iron soil pipe section designed for drain, waste, and vent (DWV) applications. It features a hub and spigot connection for secure and leak-proof joints and is resistant to corrosion, abrasion, and extreme temperatures.

Product Overview

Durable Cast Iron Soil Pipe

This durable cast iron soil pipe is engineered specifically for drain, waste, and vent (DWV) applications in both residential and commercial plumbing systems. Featuring a reliable hub and spigot connection, it ensures secure and leak-proof joints during installation. The material offers excellent resistance to corrosion, abrasion, and extreme temperatures, making it a robust choice for long-term infrastructure needs.

Technical Specifications

Application	Drain, Waste, and Vent (DWV)
Connection Method	Hub and Spigot

Performance Features

Quality	High Quality
Key Benefits	Corrosion Resistant, Abrasion Resistant, Temperature Resistant, Leak-proof
