

# Durable Metal Pressure Fan for Ventilation

This pressure fan is designed for efficient air extraction and ventilation. It features a durable metal frame and protective wire guard.

## Product Overview

### High-Efficiency Ventilation Solutions

This durable metal pressure fan is engineered for professional ventilation, exhaust, and air purification tasks in diverse environments like schools, hotels, and residential buildings. Utilizing a CAD-optimized blade design, it ensures stable airflow performance while maintaining low noise levels. The robust construction includes a rolling bearing system for extended service life, making it a reliable choice for consistent air movement requirements.

## Technical Specifications

### Available Sizes

- 250mm
- 300mm
- 350mm
- 400mm

Operating Speed	1400 rpm
Power Consumption	30 - 150W

## Performance Metrics

### Air Capacity

**15 m3/min**  
Minimum Capacity

**56 m3/min**  
Maximum Capacity

## Design Features

Key Features	Low Noise Bearing, Long Service Life, CAD Optimized Design, Easy Installation, Durable Metal Construction
--------------	---

## Application Areas

### Recommended Use

School • Hotel • Residential • Ventilation • Exhaust Systems • Dedusting
