

Durable Polycarbonate Blank Wall Plate

This blank plate is constructed from durable GE Polycarbonate(PC) material to withstand mechanical stress. It offers maximum resistance to impact, abrasion, fading, discoloration and grease.

Overview

Professional Grade Blank Wall Plate

This durable blank wall plate is engineered from high-quality GE Polycarbonate to withstand mechanical stress and high-abuse environments. Designed for safety and aesthetics, it features a smooth, easy-to-clean finish that resists dust, moisture, and common solvents. The plate is UL and CUL listed, ensuring compliance with rigorous safety standards for electrical installations.

Material & Durability

Material	GE Polycarbonate (PC)
Resistance Properties	Impact Resistant, Abrasion Resistant, Fade Resistant, Moisture Resistant, Chemical Resistant

Installation & Design

Installation Highlights

- Captive screw feature for quick installation
- Color-matched metal mounting screws included
- Smooth finish resists dust accumulation
- Rounded edges prevent injury and wall damage

Compliance & Safety

Certifications

UL Listed • CUL Listed • ETL Listed
