

Durable Rubber Wheel with Grooved Tread

This rubber wheel is designed for various applications requiring reliable rolling performance. It features a robust tire with a grooved tread pattern for enhanced grip and stability.

Product Overview

Reliable Mobility Solution

This durable rubber wheel is engineered for consistent performance in demanding environments, making it an ideal choice for carts, wheelbarrows, and general-purpose industrial equipment. The unit features a robust tire with a specially engineered grooved tread pattern designed to maximize traction and maintain stability on various surfaces. Constructed with a heavy-duty metal hub and central mounting bore, it ensures secure installation and long-lasting rolling reliability.

Technical Specifications

Mounting Mechanism

- Central axle bore
- Retaining mechanism included

Tread Pattern	Grooved
Material Composition	Rubber Tire, Metal Hub

Applications

Suitable For

Industrial Carts • Wheelbarrows • Material Handling Equipment
