

Dust Collecting Coarse Crusher

This dust collecting coarse crusher is designed for efficient size reduction of materials. It features a high-speed rotor with adjustable screen size and an integrated dust extraction system.

Overview

Advanced Coarse Crushing & Dust Collection

This Dust Collecting Coarse Crusher is a next-generation solution designed for pre-crushing processes in pharmaceutical, chemical, and food industries. It integrates crushing and dust collection into a single, vertical unit to ensure a clean, efficient production environment. Built to GMP standards, the system utilizes high-speed cutting and impact mechanisms to minimize material waste and eliminate dust emissions.

Technical Specifications

Crushing Method

- Simultaneous cutting (fixed and movable knives)
- Rotating impact (rotating knife)
- Centrifugal force material transfer

Key Features

Dust-free operation • Vertical structure • Integrated dust recovery • Corrosion resistant

Material Construction

Stainless Steel

Compliance

GMP Standard

Applications

Target Industries

- Pharmaceutical
- Chemical
- Food Processing
